1 Equality Magnets

The grid is made up of magnetic and non-magnetic plates. Each magnetic plate has two halves : one positive (+) and one negative (−).

4 Calculus Snake

Locate a snake in the grid,

7 Heyawacky OE

Shade in some cells. Shaded cells cannot be orthogonally adjacent. All the unshaded cells must form a single orthogonally connected area. There must not be a horizontal or vertical line of unshaded cells that crosses two thick boundaries. An O in a region means that there is an odd nunTey2.2 Tm ofaded cell in tat reg(rg)6(a)-5(e)6(a)-3(n)-3d(s ca)-5)-5(E is O)6(in)-3(a)r(r v)11(e)-2(g)6(a)me is
